WORK EXPERIENCE

Frontend Developer `2024`
Kerala Steds, Full-time

Passionate frontend developer with hands-on experience in building responsive web applications using React and Tailwind CSS. Completed a 6-month internship at Kerala Steds and transitioned to a full-time role. Enthusiastic about contributing to dynamic teams and growing as a developer.

Key Responsibilities:

- Built user-facing features and resolved bugs.
- Developed components using React, Tailwind CSS, and JavaScript.
- Integrated REST APIs and ensured responsive design.

Achievements:

- Improved application performance and user experience based on feedback.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind, JSX, React Router, Vite, Node.js, Axios

Tools: Git, GitHub, VS Code, Postman, Firebase, Prettier,Supabase,Firebase,Cloudinary

Others: REST APIs, JSON, Google Authentication

Languages: English, Malayalam,Tamil

PROJECTS

ProjectName: Meal Recipe App
TechStack: HTML, CSS, JavaScript, APIs

Link: https://mealrecipeappcom.netlify.app/

Description: Implemented a search feature to find recipes by name, ingredients, or category using JavaScript and APIs. Built with dynamic filtering logic and responsive UI. Used the Fetch API to retrieve and display results. Hosted the app using Netlify.

ProjectName: E-commerce App

TechStack: React.js, FramerMotion, HTML, CSS, JavaScript, APIs, Tailwind, PaymentGateways, React Router, Supabase, Database

Link:

Description: This is my ongoing freelance e-commerce project, currently under active development. New features and improvements are being added regularly, including product listings, user authentication, cart functionality, and secure checkout integrations. The project is not yet fully completed, but it continues to evolve as I build more advanced and responsive functionalities.
